EDUCATION

Integrated Master of Technology in Computer Science and Engineering 2022 – 2027 CGPA: 8.27/10
Vellore Institute of Technology (Computational and Data Science)

PROJECTS

InsightPilot: – Executive Decision Intelligence Platform 2026
Tech Stack: Python, Streamlit, Gemini API, SQLite, Plotly

- Consolidated revenue, customer, and product analytics into a unified executive dashboard, reducing decision-making time by 35%.
- Generated 50+ AI-powered business insights using Gemini API, including KPI summaries, growth opportunities, and strategic recommendations.
- Designed customer segmentation and performance-monitoring workflows across 10+ business KPIs to improve executive reporting efficiency.

TradeLens: – AI Stock Forecasting and Financial Analytics Platform 2025
Tech Stack: Python, Pandas, NumPy, ARIMA, LSTM, Matplotlib

- Processed and modeled 10,000+ historical stock market records using Python, Pandas, and NumPy for predictive analytics.
- Achieved forecasting accuracy of 85% using ARIMA and LSTM models while evaluating performance through RMSE, MAE, and MAPE.
- Engineered technical indicators including SMA, EMA, RSI, and volatility metrics, improving trend-identification capabilities.

AlloHealth Analytics Platform 2025
Tech Stack: Python, SQL, Power BI

- Examined 5,000+ healthcare records to identify patient trends, treatment outcomes, and operational performance indicators.
- Automated data preparation and SQL reporting workflows, reducing manual analysis effort by 40%.
- Created interactive Power BI dashboards tracking 15+ healthcare KPIs for performance monitoring and decision support.

Hisab: – Full-Stack Personal Finance Analytics Platform 2025
Tech Stack: React.js, Node.js, MongoDB, JavaScript

- Developed a full-stack expense management application supporting budgeting, transaction tracking, and financial analytics.
- Managed 500+ financial transactions through secure CRUD operations and category-based expense classification.
- Visualized spending behavior through interactive dashboards, enabling users to identify savings opportunities and improve budgeting decisions.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL, C++, R
Machine Learning: Scikit-Learn, ARIMA, LSTM, Predictive Modeling, Time Series Forecasting, Classification, Regression, Feature Engineering
Generative AI: Gemini API, LLM Integration, Prompt Engineering, Conversational AI
Analytics: Pandas, NumPy, EDA, Business Analytics, Product Analytics, Customer Segmentation, KPI Monitoring
Visualization: Power BI, Tableau, Matplotlib, Plotly, Streamlit
Databases: MySQL, MongoDB, SQLite
Web Technologies: React.js, Node.js, JavaScript, HTML, CSS, REST APIs
Tools: Git, GitHub, Vercel, Agile Development

CERTIFICATIONS

- Generative AI Professional – Oracle 2025
- AI Foundations – Oracle 2025
- Applied Machine Learning in Python – Coursera 2026
