

# MANAS DAS

7470695607 | manasd0411@gmail.com | LinkedIn | GitHub

## Summary

---

Data Science and Software Engineering student experienced in building machine learning models, analytics dashboards, and data-driven applications. Skilled in time-series forecasting, predictive modeling, and transforming raw data into actionable insights using Python, SQL, and modern web technologies.

## Education

---

### Vellore Institute of Technology

2022 – 2027

Integrated M.Tech in Computer Science and Engineering

CGPA: **8.24** / 10

## Technical Skills

---

|                          |                                                                              |
|--------------------------|------------------------------------------------------------------------------|
| <b>Programming:</b>      | Python, Java, C++, R                                                         |
| <b>Machine Learning:</b> | Scikit-learn, ARIMA, LSTM, Time Series Forecasting, Feature Engineering, EDA |
| <b>Data Tools:</b>       | Pandas, NumPy, Matplotlib, Power BI, Tableau, Excel                          |
| <b>Databases:</b>        | SQL, MongoDB                                                                 |
| <b>Web:</b>              | React.js, JavaScript, HTML, CSS                                              |
| <b>Tools:</b>            | Git, GitHub                                                                  |

## Projects

---

### Hisab — Expense Tracker & Analytics Dashboard | Python, React.js, MongoDB, Power BI

- Built a full-stack expense tracking application to log transactions, categorize spending, and generate structured financial summaries.
- Developed a React-based analytics dashboard to visualize daily, weekly, and monthly expense trends with category-level insights.
- Implemented automated analytics to detect overspending patterns and provide budgeting insights.

### TradeLens — Stock Price Forecasting | Python, Pandas, NumPy, Matplotlib

- Processed OHLCV market data and engineered financial indicators including SMA, EMA, and RSI.
- Developed ARIMA and LSTM models for time-series forecasting of stock price movements.
- Evaluated predictive performance using MAE, RMSE, and MAPE and visualized predicted vs actual prices.

### StaySense — Telecom Customer Churn Analytics | Python, SQL, Power BI

- Built interactive Power BI dashboards to analyze customer churn trends and retention KPIs.
- Cleaned and structured telecom datasets using Python and SQL for reliable analytics.
- Conducted exploratory data analysis to identify key churn drivers and behavioral patterns.

## Certifications

---

Applied Machine Learning in Python — Coursera (2023)

Oracle Data Science Professional — Oracle (2025)

## Achievements

---

National-level football player demonstrating discipline, teamwork, and high-performance execution under competitive environments.
